

Contents Cleaning

Following a loss, contents of a home or building may require cleaning. This can be a painstaking and time-consuming task. Generally, it requires documentation, listing and photos to confirm what items were on-site and damaged during the loss.

ATP Restoration handles these tasks for you. Contents that can be cleaned and salvaged will be inventoried, carefully packed, and taken to our secure warehouse facility for cleaning. We use the most recent technology to restore your personal belongings back to their pre-loss condition. Once cleaned, your items will be stored until you are ready for us to deliver back to your home or office. Contents that are not salvageable will be itemized and noted with photos and a report will be provided to you and your insurance provider.

It is also important to consider whether an item is worth cleaning. This can be a great time for you to “purge” items that are no longer used or wanted. Generally, cleaning costs less than replacing. However, there are circumstances where an item can be replaced for less than cleaning.

ATP Restoration and our industry partners have the ability to clean all types of contents. These items include but are not limited to:

- Furniture
- Electronics
- Clothing and other textiles (offer a 24-48 hour rush)
- Hard items (dishes, glasses, utensils, frames, etc.)
- Heirlooms

It is important to note that after a fire, depending on the severity, heat, and smoke damage, it is not advisable to consume medicine or food items due to the toxicity of the smoke.
